

Medium Voltage - Variable Speed Drive

XMV660 Series

280kW-8800kW/2.3kV, 3kV-3.3kV, 4.16kV,
5kV-5.5kV, 6kV-6.6kV, 10kV, 11kV

XMV660 MV drive goes one step further in achieving high performance by implementing our proven low voltage technology within a modular and reliable configuration. An input phase shift transformer powers low voltage cells that are combined in series producing a quasi-sinusoidal current and voltage output wave with a reduced dV/dt and THDi level. It is designed under the strictest safety regulations and complies with the most demanding industrial requirements. The XMV660 is available in a wide voltage and power range, offering the best power quality, maximum motor care, uncompromising safety and reliability with reduced maintenance across the whole range.
